

RAILING BAR

Installation Instruction

Petunjuk Pemasangan

INSTALLATION INSTRUCTION

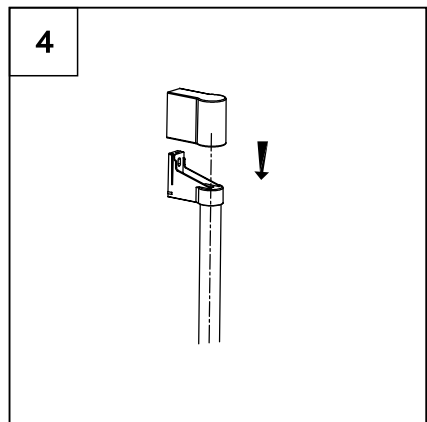

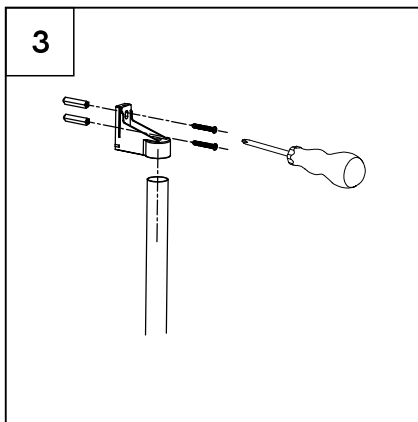

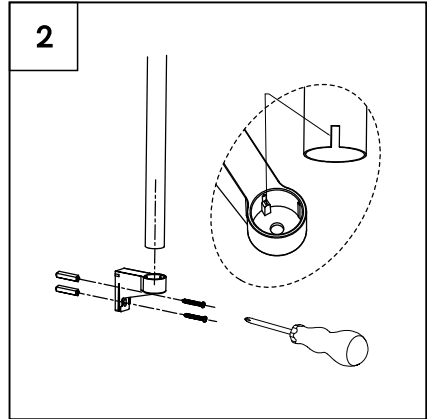

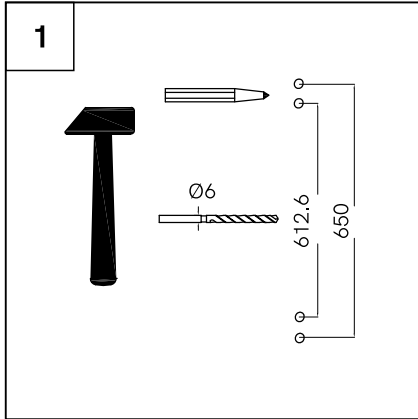

Installation steps :

1. Drill four holes in the wall (dia. 6mm).
The distances of their central holes is shown in Figure 1.
2. Put four plastic plugs into the holes. Fix the wall bracket on the bottom with the screws. Then put the rail on the wall bracket.
Pay attention as the Figure 2 shows.
3. Put the top wall bracket onto the rail. Then fix it with the screws.
4. Put the decorative covers onto the brackets.

* This installation instruction is suitable for RB D34 and RB D39 BL

PETUNJUK PEMASANGAN

Langkah-langkah Pemasangan :

1. Buat empat lubang pada dinding dengan menggunakan Bor (diameter: 6mm). Jarak antar lubang tengah dapat di lihat pada gambar 1.
2. Masukkan *Fisher* ke dalam lubang. Pasang braket dinding di bagian bawah dengan sekrup. Kemudian, letakkan tiang shower pada braket dinding. Perhatikan gambar 2.
3. Pasangkan bagian atas braket dinding ke tiang shower dengan sekrup.
4. Letakkan penutup dekoratif pada braket.

* Instruksi pemasangan ini dapat diaplikasikan untuk RB D34 dan RB D39 BL
